UPCOMING EVENTS

Annual ESG Conference

October 7-8, 2025

Join thought leaders, practitioners and change-makers dedicated to advancing sustainability in our communities

Agri-Show Exhibition

June 5-7, 2025

Let's pack the stand at the Agri-Show and support the sustainability cause.

ESG CONFERENCE 2ND EDITION 2025

From Vision to Action: Integrating Sustainability.

Let the countdown begin! We are a couple of months away from the annual conference. Join us for the 2nd Edition of the ESG Conference, happening from October 7-8, 2025, at the beautiful Troutbeck Resort in Nyanga. This year, the theme is "From Vision to Action: Integrating Sustainability."

This is a unique opportunity to connect with industry leaders, share insights, and collaborate on sustainable solutions that drive positive change. Don't miss your chance to be part of this vital conversation!

INSAF

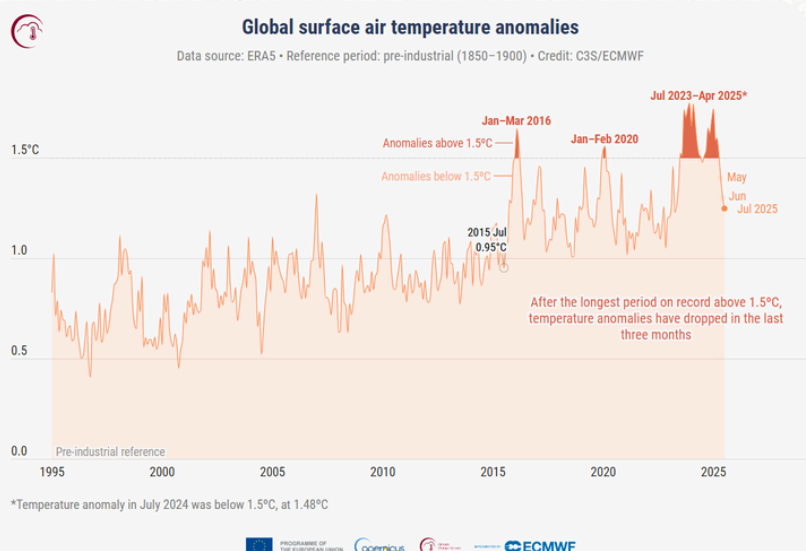

Join us at the Agri-Show from the 5th to the 7th of June 2025 for an exciting opportunity to explore sustainability. We invite you to visit our stand, number C13, where our team of experts will be ready to engage in meaningful discussions about innovative solutions and sustainable practices that can help shape how organizations and businesses operate. Whether you're a farmer, industry professional, or simply passionate about sustainability, this is the perfect chance to exchange ideas, learn about the latest advancements, and discover how we can work together to promote environmental stewardship. Don't miss out, come and join the conversation on sustainability at the Agri-Show!

Sustainability news around the globe.....

CLIMATE IMPACTS INTENSIFY

The latest Climate Bulletin by the Copernicus Climate Change (C3S) service confirms that July 2025 was +1.25°C above the pre-industrial baseline (1850–1900). It was only the fourth month in the past 25 months with a global-average surface air temperature below the 1.5°C threshold set by the Paris Agreement. Although global temperature records have eased slightly, climate-related events such as heatwaves, floods and wildfires heavily affected some regions worldwide in July, leading to significant health impacts, loss of life and damages...Read more <https://climate.copernicus.eu/third-warmest-july-globally-extreme-climate-events-continue>

Kenya Advances Direct Air Carbon Capture

On July 18, 2025, engineers in central Kenya began using geothermal steam to capture carbon dioxide directly from the air, scaling up direct air capture technology as a potential solution to combat climate change. The project leverages Kenya's geothermal resources for sustainable carbon removal. Read more...<https://turritopsis.org/en/harnessing-geothermal-steam-kenyas-bold-leap-in-direct-air-capture/>

Our Purpose

Make Sustainability Happen

Our Vision

Advancing Sustainability Initiatives for Africa

Our Mission

**Help our stakeholders achieve their
sustainability goals because we make it our
purpose.**
